PETITION TO MAKE SPECIAL – ACCELERATED EXAMINATION

Applicants hereby petition to make the above-identified application special for purposes of accelerated examination, pursuant to MPEP §708.02.

In support of this petition, applicant submits the following:

(1) A copy of the information disclosure statement (Form PTO/SB/08A) filed on January 22, 2004 with the application citing the results of a pre-examination search of patents and publications; and

(2) A check in the amount of \$130.00 for the fee required under 37 C.F.R. §1.17(i).

The field of the pre-examination search included:

Class 114, subclasses 312, 331, 334 and 336;

Class D12, subclass 308; and

06/01/2004 LHNDIHI 00000099 10763041 130.00 0P
01 FC:1460

Class B63G, subclass 08/00

A copy of each of the references believed to be most closely related to the claimed subject matter discovered during that search have been submitted with the Information Disclosure Statement filed with the application.

A discussion of the references pointing out how the claimed subject matter is patentable over the references is included on a separate sheet with this petition.

The office is hereby authorized to charge any additional fees which may be required in connection with this Petition and to credit any overpayment to our Deposit Account No. 50-1433.

If a telephone interview would advance the prosecution of this application, the Examiner is respectfully requested to call the undersigned attorney.

Granting of this petition and prompt consideration and allowance of the application are respectfully requested.

Respectfully submitted,
KEUSEY, TUTUNJIAN & BITETTO, P.C.

Dated: May 26, 2004

Discussion of References

Innespace, Redding CA, www.innespace.com. This Bionic Dolphin disclosure discloses a positively buoyant vessel that mimics the jumping of a dolphin.

Aquarius Subeo, Essex England, discloses negatively buoyant submersible that utilizes buoyancy tanks to maintain depth and control. Life support is provided to a main cabin.

About Subeo, Subeo Ltd., Essex England. The pitch of the craft is altered by a lead trim system which moves a weight forward and aft. Roll trim is provided by pumping water from side to side in the main spherical variable buoyancy tanks to either side of the vessel's center of gravity.

None of the references uncovered during the search disclosure or suggest the following claimed features of applicant's invention:

- 1) At least one pair of wings disposed on the hull, where the wings have control surfaces movable in opposite directions with respect to each other to provide the submersible with the ability to roll;
- 2) At least one pressure pod for accommodating at least one person in a recumbent sitting position;
- 3) The at least one pressure pod is maintained at a constant pressure, where the constant pressure provides the submersible with a positive buoyancy;
- 4) The at least one pressure pod is maintained at a constant pressure of 1.0 Atm.; and
- 5) A life support system connected to the at least one pressure pod for providing life support systems to the pressure pod only.
